THIS SYSTEM WAS DAMAGED BY DEREGULATION OF THE PULSE

Musicians are not obliged to try to play a Da Capo. Da Capo is played with the following rules:

1. It is no possible to play Da Capo alone
 2. Violin plays $\text{♩.} = 60$ till "FINE" ($\text{♩} = 45, \text{♪} = 90$) and Cellist plays pulse = 90
 3. The musicians link all systems without breathes (')
 4. If one of them chooses to play Da Capo, it engages both.
- Then the musicians must go till "FINE", they run in their own tempos, it supposes they do not synchronize their acts anymore.
